Coastal Waters & Harbor Ordinance Amendment

The purpose of this amendment is to avoid collisions between and among vessels on moorings in the Rockport harbor and injuries to individuals on such vessels. This is to be accomplished by regulating the length of vessels on moorings in certain portions of the harbor in Section 502.3 of the Rockport Coastal Waters & Harbor Ordinance Amendment.

Language added to the existing ordinance is underscored:

502 – Assignment of Moorings

The Harbormaster shall assign and indicate only to owners of vessels the location that they may occupy for mooring purposes and shall change the location of those moorings from time to time when the crowded condition of the anchorage, the need to conform to 38 M.R.S.A § 7-A or other conditions render the change desirable.

....

502.3. Large Vessel Location Limitation: Vessels of forty feet (40' LOA) or greater will not be assigned a mooring location in the Inner Harbor. Vessels of more than fifty feet (50' LOA) or greater will not be assigned a mooring location in the Inner or Middle Harbor.
